

Towards a harmonised methodology for statistical indicators

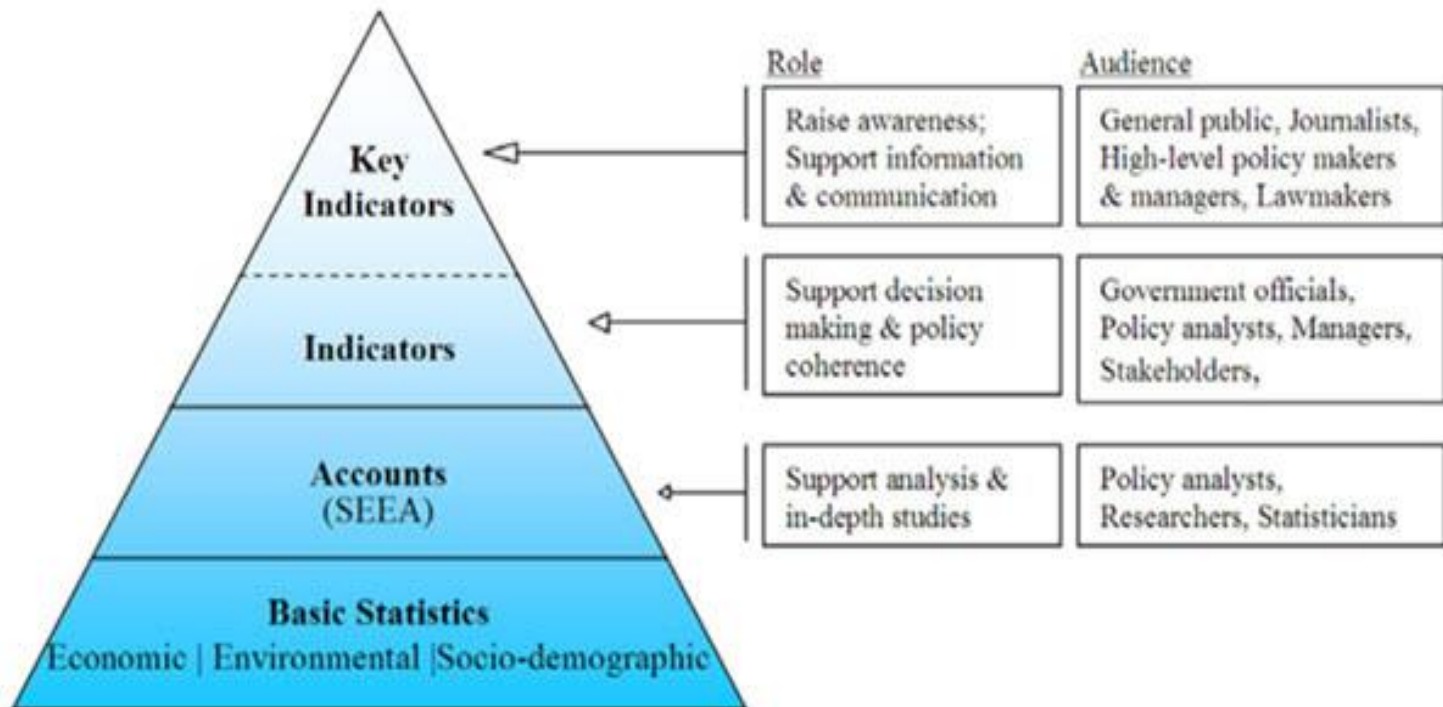

Eurostat Indicator typologies and terminologies

- The first paper on '**Indicator typologies and terminologies**' was published in 2014.
- The second paper on '**Communicating through indicators**' was released in February 2017.
- The third paper „**Towards a harmonised methodology for statistical indicators- Relevance of indicators for policy making**” 2017 edition

Statistical information structure

Statistical information structure: from basic statistics to key indicators.

Key quality criteria for policy relevant indicators

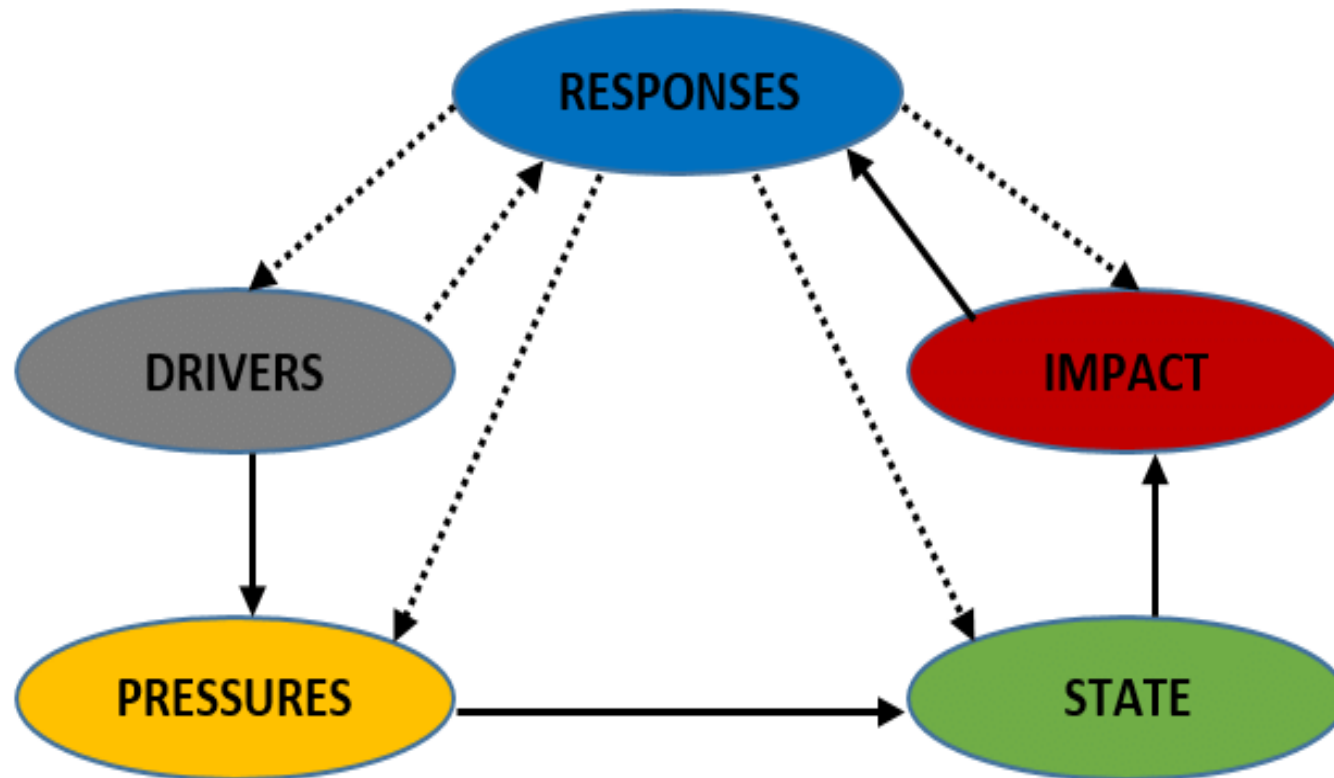

five criteria must be followed to ensure the quality of statistical output being in such way relevant for indicators

- **Relevance**
- **Accuracy and reliability**
- **Timeliness and punctuality**
- **Coherence and comparability**
- **Accessibility and clarity**

EEA Indicator DPSIR typologies

- The DPSIR framework

Which indicators are used to monitor the progress towards a waste management?

- The List was proposed 21 Key Indicators and 26 Sub-indicators:
 - in order to standardize monitoring and international reporting
 - monitor the achievement of strategic objectives
 - monitoring of the quantities of waste generated, management processes, environmental pressures due to the effects of waste, and economic instruments
