Committee on Statistics of the Ministry of National Economy of RK

The Committee consists of 17 Divisions and 16 territorial statistical offices

Environmental statistics are in the competence of the Division of Production and the Environment

Total 5 national statistical observations on ecology

Published 4 statistical bulletins, 2 express information, 1 press release, 1 collection

Objectives of environmental statistics

- International comparability of indicators

- Providing users with reliable statistical information
 - Government
 - Government bodies
 - International organizations (CIS Statistical Committee, UN Statistical Division, UNECE, Eurasian Economic Commission)
 - Media, Research Institutes
 - Business environment, students
 - Domestic users (DNA for building an environmental account in the System of National Accounts (SNA))

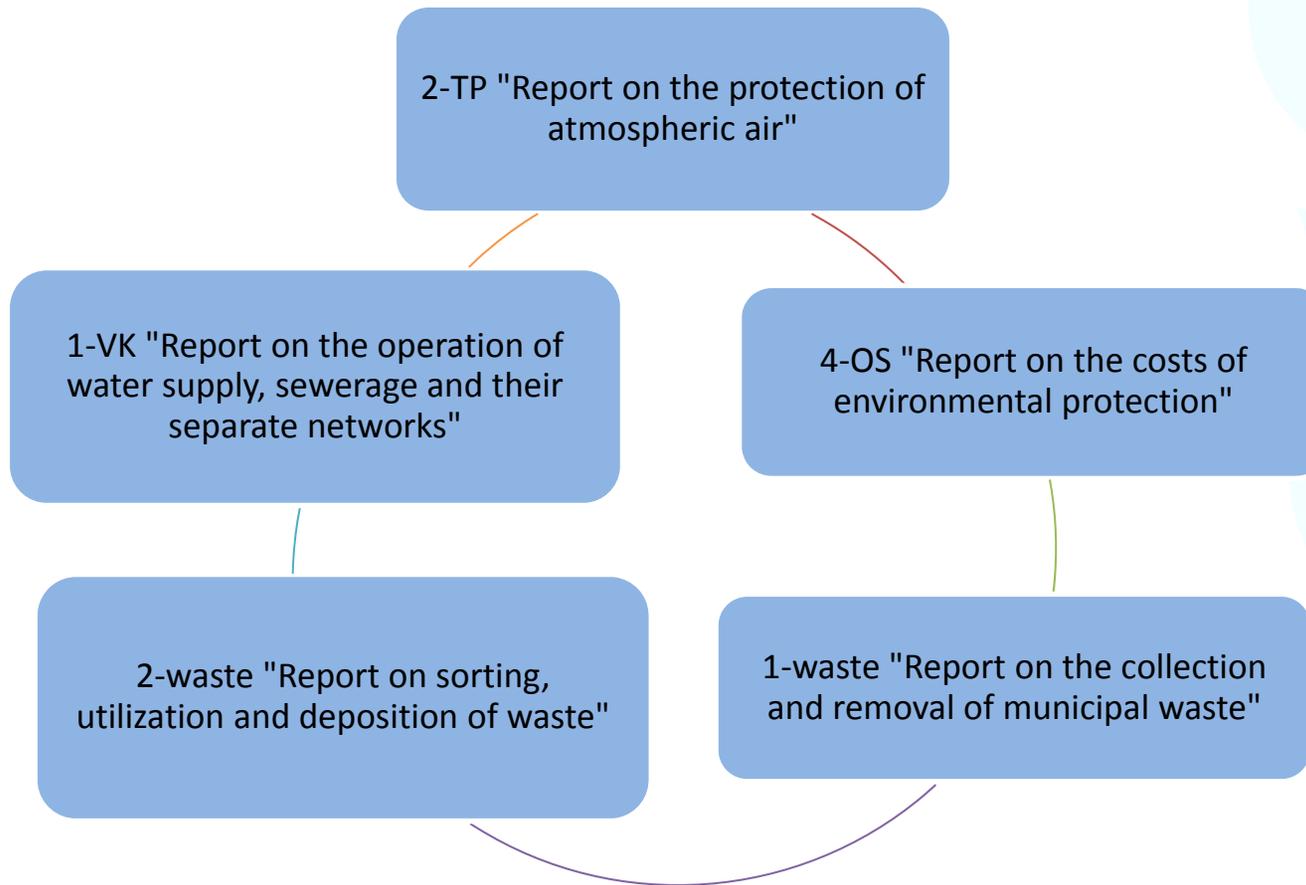

The legal framework for conducting environmental statistics surveys

- 1 The Law of the Republic of Kazakhstan "On State Statistics"
- 2 Ecological Code of the Republic of Kazakhstan
- 3 The concept of the transition of the Republic of Kazakhstan to a "green economy" for 2013-2020
- 4 Plan of statistical works of the Committee on Statistics of the Ministry of National Economy of the Republic of Kazakhstan

Forms of annual state-wide statistical observation of environmental statistics

Formed indicators of environmental statistics

Index 2-TP "Report on the protection of atmospheric air"

- the volume of emissions of pollutants into the atmosphere (by region);
- the volume of pollutants emanating from all stationary sources of pollution;
- the volume of pollutants received at treatment facilities;
- volume of pollutants released without treatment;
- emissions of specific pollutants into the atmosphere.

Index 4-OS "Report on the costs of environmental protection"

- the amount of costs for environmental protection (by nature protection activities);
- charge for regulatory emissions (discharges) of pollutants;
- charge for excess emissions (discharges) of pollutants;
- means (claims, fines) recovered in compensation for damage caused by violation of environmental legislation;
- payment for the use of natural resources; special payments of subsoil users.

Formed indicators of environmental statistics

Index 1-waste "Report on the collection and removal of municipal waste"

Index 2-waste "Report on sorting, utilization and deposition of waste"

- number of enterprises engaged in collection and removal of municipal waste;
- volume of collected and exported municipal waste;
- volume of waste received for sorting, disposal and deposit;
- volume of sorted waste;
- the amount of waste to be treated;
- volume of recycled and deposited waste.

Index 1-VK "Report on the operation of water supply, sewerage and their separate networks"

- number of enterprises, availability of water supply and sewerage facilities;
- length of water and sewage networks;
- production capacity and number of pumping stations;
- volume of water dispensed to consumers;
- the release of water by economic activity.

Interaction with government bodies

•Ministry of Energy of RK

- Committee for Environmental Regulation and Control
- JSC Zhasyl Damu
- RSE "Kazhydromet"

•Ministry of Agriculture of RK

- Committee on Water Resources
- Committee on Land Management
- Committee of Forestry and Wildlife State Inspection
- Committee in the agro-industrial complex

•Ministry of Health of RK

- Committee for Public Health Protection

•Ministry for Investment and Development of RK

- Committee of Geology and Subsoil Use
- Committee for Construction and Housing and Communal Services

•Ministry of Internal Affairs of RK

- Committee on Emergency Situations

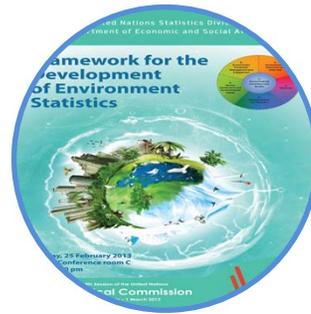

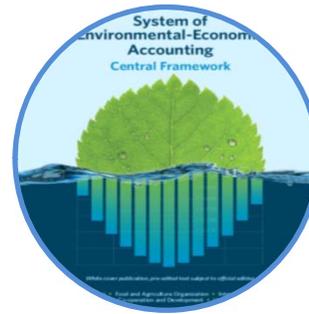

International standards

Environmental indicators for EECCA countries (UNECE)

Basic principles for the development of environment statistics (UNSD)

The system of environmental and economic accounting (UN)

Indicators of green growth (OECD)

Compliance of the statistical methodology of the environment with European and international standards

Methodology for the formation of indicators of environmental statistics

- Environmental indicators for EECCA countries (UNECE);
- Framework for the Development of Environment Statistics (UNSD)
- Indicators of green growth (OECD)

The methodology for the formation of primary indicators necessary to build an environmental account in the System of National Accounts (SNA)

- The system of environmental and economic accounting (UN) (SEEA 2012)

Methodology for editing data in production and environmental statistics

- Special Data Dissemination Standard (SDDS) International Monetary Fund

The international cooperation

The cooperation of the Committee on Statistics with the OECD has begun in April 2014 to introduce indicators of "green" growth.

Based on the results of the training workshop with OECD experts in Astana, a report was prepared in June 2016.

In this report, international experts gave a positive assessment of the work done to compile a pilot version of the OECD green growth indicators that are feasible and relevant for Kazakhstan.

The report includes methodological recommendations on the formation of further indicators of green growth of the OECD.

Activities of the Committee on Statistics on Green Growth Indicators from 2014 to 2018

- An analysis of the OECD Handbook on PP indicators was conducted.
- A working group was created with the participation of state bodies.
- The international practice of forming indicators was studied.
- Interaction with authorized state bodies on data exchange for the introduction of indicators was established.
- Green growth indicators of the OECD, necessary for monitoring the transition of the Republic of Kazakhstan to the "green" economy, have been introduced.
- The indicators are posted on the Committee's Internet resource ([www.stat.gov.kz/General / Official statistical information / Operational data \(express information, bulletins\) / Environmental protection / Green economy indicators](http://www.stat.gov.kz/General/Official%20statistical%20information/Operational%20data%20(express%20information,%20bulletins)/Environmental%20protection/Green%20economy%20indicators)).

The main tasks of environmental statistics

- Development and approval of indicators of Green Growth Indicators that are feasible and relevant for Kazakhstan and consistent with international requirements.
- Report on Green Growth in the Republic of Kazakhstan.
- Integration of the measurement of green growth into the regular reporting system for Kazakhstan.
- Dissemination and communication of project results to the main stakeholders in Kazakhstan and beyond.

Thank you for attention!
