

Self-mapping of national data flows relevant to SEIS and SDG indicators

- DISCUSSION SESSION -

National Workshop on SEIS and Environmental Statistics for the SDGs
Dushanbe, 16-18 October 2017

Mr. Michael Nagy, United Nations Economic Commission for Europe (UNECE)
Mr. Matthew Billot, UN Environment (UNEP)

Objectives of the discussion session

To review relevant environmental indicators under SEIS and the SDGs Global Indicator Framework taking into account key strengths and challenges in Tajikistan, notably:

- a) Existence of relevant data flows already being produced in Tajikistan (and identification of respective sources)
- b) Possible gaps in terms of data availability, methodology and/or capacity
- c) Opportunities for improving national capacity towards the production of data flows for SEIS and SDG indicators to support future reporting at national level

Identified gaps and opportunities will inform next steps and future capacity building activities under the scope of UNECE & UN Environment project activities in Tajikistan
